Pablo-100

## Professional Summary

---

System and Network Administrator SOC Analyst L1 with hands-on experience in secure infrastructures, network administration, and security monitoring. Skilled in Linux and Windows Server environments, SIEM systems (ELK Stack), and incident detection and analysis. Strong background in Cisco and Huawei networking, with practical experience in SOC operations and cybersecurity projects. Active full-stack developer with multiple production-grade platforms built from scratch.

## Education

---

### Computer Systems & Network SecurityTEK-UP University

Engineer's Degree, Tunisia2024 – Present

### Computer Networks and ServicesHigher Institute of Technological Studies

Bachelor's Degree, RadesGraduated 2024

## Professional Experience

---

### TDS Tunis, Tunisia

VOC – Vulnerability Intelligence DashboardJul 2025 – Sep 2025

- Developed a real-time CVE dashboard collecting, filtering, and displaying new vulnerability entries with automatic updates every minute
- Integrated multi-source threat intelligence from NVD and Vulners APIs, merging and deduplicating data to provide a unified vulnerability view
- Implemented Telegram alerting for critical and high severity vulnerabilities with formatted messages and duplicate suppression logic
- Designed interactive visualizations using Chart.js, Bootstrap, and DataTables for filtering, sorting, and data manipulation
- Added CSV export functionality and emphasized performance optimizations (lazy loading, caching) and robust error handling

### Topnet Tunis, Tunisia

PFE Internship – Cybersecurity InternFeb 2024 – Jul 2024

- Deployed SIEM solution using ELK Stack for 50+ endpoints, improving incident visibility by 40%
- Configured Logstash pipelines and Kibana dashboards for real-time monitoring
- Installed multi-platform agents (Windows 7/10, Rocky Linux) for centralized log collection
- Performed penetration tests and vulnerability scans with Kali Linux, discovering 12+ critical issues
- Managed Ubuntu server hosting the SIEM system

### Tunisie Telecom Tunis, Tunisia

Technician Internship – Network OperationsJan 2023 – Feb 2023

- Configured xDSL and IP-MSAN services for over 300 clients with <5% downtime
- Deployed and tested fiber optic connections with signal quality >98%
- Troubleshoot last-mile issues in residential and business broadband setups

### Tunisie Telecom Tunis, Tunisia

Technician Internship – Cisco NetworksJan 2022 – Feb 2022

- Installed and configured 20+ Cisco routers and switches in real environments
- Structured cabling and patch panel deployment across 3 company sites
- Assisted in configuring VLANs and routing protocols (static + RIP)

## Key Projects

---

### Python & Security

*Oktopus SOC – Custom SIEM / IDS / IPS System*

**Stack:** Python 3.8+, WebSocket, SQLite, HTML/CSS/JS Vanilla, iptables, netsh

- Built a full Security Operations Center from scratch covering: log collection, transport, parsing, detection, prevention, geo-IP, MITRE ATT&CK mapping, and real-time visualization
- Implemented 36+ IDS detection rules (regex + behavioral + contextual) with 46+ MITRE ATT&CK technique mappings across the full kill chain
- Developed multi-OS agents (Windows, Linux, Android/Termux) with TCP buffering, auto-reconnect, and real-time system monitoring (CPU, RAM, disk, processes)
- Built IPS engine with automatic IP blocking via iptables/netsh, configurable block durations, whitelist, and auto-unblock; designed 5-tab WebSocket dashboard with Canvas Mercator world map

### Type Script & Full-Stack

*OCTUPUS Education – RHCSA Learning Platform*

**Stack:** React 19, TypeScript, Node.js, Express, tRPC, Drizzle ORM, PostgreSQL (Neon), Tailwind CSS, Vite

- Built a comprehensive RHCSA certification platform with 12 structured chapters, 125+ Linux commands reference, 18 progressive hands-on labs, and 5 practice exams
- Implemented type-safe full-stack API using tRPC with JWT authentication and OAuth2 providers (Google, GitHub, local)
- Integrated AI-powered RHCSA assistant for real-time troubleshooting, bilingual EN/FR support, PDF export, and interactive Linux terminal emulator

### Laravel & Full-Stack

*Smart Invest Summit – B2B Matchmaking Platform*

**Stack:** Laravel 12, PHP 8.2+, Blade, Tailwind CSS 3, Alpine.js, MySQL 8, Vite, PHPUnit

- Built a B2B event platform connecting investors and startups with complete workflow: registration, admin validation, matchmaking, private messaging, and meeting scheduling
- Implemented role-based admin-approval-gated matchmaking, match request states (pending/accepted/rejected), B2B meeting scheduler with conflict detection, and in-app notifications

### Laravel & Livewire

*Delivery Platform – Logistics Management System*

**Stack:** Laravel 11, Livewire 3, Tailwind CSS, Alpine.js, MySQL 8, DomPDF, QR Code, TextFlow/Infobip APIs

- Built multi-role delivery management platform (Super Admin, Admin, Driver) with multi-depot architecture and inter-depot transfers
- Implemented full parcel lifecycle: automatic QR code generation, photo proof of delivery, GPS tracking, and PDF bordereau generation
- Developed SMS notification system in Tunisian Arabic via TextFlow and Infobip APIs; built driver/vehicle performance history tracking

### Python & Machine Learning

*Network Intrusion Detection System (NIDS) Academic*

- Designed hybrid NIDS using Python and Scapy for real-time traffic analysis with signature-based and anomaly-based detection (Isolation Forest, scikit-learn)
- Built Flask REST API and real-time monitoring dashboard (HTML, JS, Chart.js); simulated SQL injection, port scans, and malformed packets to validate detection accuracy

### Symfony

*Full-Stack E-commerce Platform Academic*

- Developed a secure full-stack e-commerce web application using Symfony 7 and PHP 8
- Implemented MVC architecture, REST-like controllers, Doctrine ORM, OAuth2 (Google/Facebook), RBAC, and Docker deployment (Web + MariaDB)

### System Administration

*Windows Server & Active Directory Infrastructure Academic*

- Built enterprise Windows Server environment with Active Directory, Group Policy, DHCP, firewall rules, audit policies, and backup system

## Network Administration

### *Enterprise Network Architecture*

- Designed multi-site network with Layer 3 switches, VLAN segmentation, and ACLs; configured Eth-Trunk and high-availability routes — Tools: Cisco, Huawei, eNSP, Ubuntu Server

### *VoIP System Deployment*

- Deployed VoIP solution using Cisco CUCM for 100+ users; configured voice VLANs, DHCP for IP phones, and QoS policies — reduced communication cost by 60% versus PSTN

## Technical Skills

---

**Networking:** Cisco CCNA, Huawei Equipment, VLAN Configuration, IP-MSAN, xDSL, Eth-Trunk, IPsec VPN, Layer 3 Switching, Routing Protocols (RIP, Static), Network Design, Access Control Lists (ACL), Quality of Service (QoS)

**Security:** ELK Stack, SIEM Implementation, IDS/IPS, MITRE ATT&CK, Penetration Testing, Vulnerability Assessment, Metasploit, Nessus, OpenVAS, Nmap, Burp Suite, Kali Linux, Security Monitoring, Incident Response, SOC Operations

**Systems:** Ubuntu, Kali Linux, Rocky Linux, CentOS, RedHat, Windows Server, Active Directory

**Virtualization:** VMware, ESXi, VirtualBox, Docker

**Monitoring:** Wireshark, TCPDump, Netstat, htop

**Web & Dev:** PHP, Python, Scapy, scikit-learn, Flask, Laravel 12, Symfony 7, Livewire, React, TypeScript, Node.js, Express, tRPC, Alpine.js, Tailwind CSS, Drizzle ORM, Doctrine ORM, OAuth2, JAVA, Bash, PowerShell, HTML, CSS, JavaScript, Chart.js

**Databases:** MySQL, PostgreSQL, SQLite, MariaDB

**Services:** Apache, FTP, DHCP, DNS, Samba, NFS, Group Policy, WebSocket, Vite, Git

## Certifications

---

- PCAP: Programming Essentials in Python (OpenEDG)
- CCNA1: Introduction to Networks (Cisco)
- Networking Devices & Initial Configuration (Cisco)
- Junior Cybersecurity Analyst Career Path (Cisco)
- Fortinet Certified Associate in Cybersecurity
- Blue Team: PowerShell, SOC, Virtual Machines (Security Blue Team)

## Professional Development

---

- Team Leadership & Communication (Securinets Club)
- Root Cause & Incident Analysis
- Project Management: Planning, Resource Allocation, QA

## Community Involvement

---

### *Securinets TEK-UP Member 2024 – 2025*

- Participate in Capture the Flag (CTF) competitions and cybersecurity challenges
- Engage in red team and blue team security exercises and penetration testing workshops
- Contribute to SOC simulation workshops and incident response training
- Develop advanced cybersecurity skills through hands-on practical exercises

## Languages

---

**Arabic:** Native

**French:** Intermediate

**English:** Intermediate
